CELERY CABBAGE (Pe-tsai)

Per lb

Improved Peking, or Chihili \$ 0.25

Makes torpedo shaped head, long and pointed at the top. The head is crisp and is of fine flavor.
While the yield is not very heavy, it is more easily cultivated and matures very early. Very popular
in the United States.

Chokurei 0.30

This is a straight leaf of open heading type, tall growing and can be compared to Cos Lettuce in
appearance. Very easy of cultivation and a heavy cropper. This is the variety which is often called
Pe-tsai.

Market Pride 0.30

Early and easy of culture, but produces head much more tender than other types. Not very large,
but measures 8 inches in diameter and 14 inches in height. Light green in color and practically no
fibrous leaves grow. Its earliness and easy cultivation made this one of the most popular Pe-tsai now
under cultivation. Although late summer or early autumn sowing is best, this variety may also be
well adopted for spring sowing.

Paoting 0.30

An improved type of Wong Bok which forms a large solid head of very fine quality, often weigh
15 pounds. Stands long before bolting to seed. One of the best market varieties.

Shantung 0.30

A variety of Pe-tsai which is easy of culture, forming a large long head with light green leaves
and pure white heart.

Spring Giant 0.30

If the spring is long, it can be grown for summer use. Seed sown in late March will make a
head of about 6-7 lbs. in June. Also can be sown in summer as ordinary Pe-tsai cabbage, then they
make large solid head.

Che-foo 0.30

This is one of the largest Pe-tsai, easily measuring 9 inches in diameter and 14 inches in height.
The head is very solid and of excellent texture. The most prolific variety and a very popular
market type.

Wong Bok 0.25

The most popular variety of Pe-tsai forming a large firm head. A good market variety.

Kashin 0.30

Loose-headed variety with white centers. Heavy yielder with white tender center leaves which
supplies a good salad.

Katoh 0.35

A straight grower like Chihili, but not quite solid headed. Grows much larger with dark green
leaves which are very delicious. A heavy yielder.

CHOPSUY GREEN (Shungiku)

Chopsuy Green or Shungiku 0.35

This is one of the most important oriental greens belonging to the Chrysanthemum family.
Highly valued because of its aromatic flavor. It is harvested when plant is 4-5 inches high and is
cooked like Spinach. Very easy of culture and does not require any special attention.

CUCUMBER

	Per lb
Green Giant	\$ 2.50
A very hardy disease resistant variety. The fruit is dark green, slender, 8-10 inches long, 1½ inch in diameter, with a few brown spines. Very prolific.	
Japanese Green Climbing	2.50
An early and prolific variety. The fruits are borne on almost every axils, pale green and comparatively smooth skinned.	
Suyo	5.00
Dark green, long hardy and resistant to diseases. Flesh crisp. Skin somewhat irregular.	
Extra Long (Yamato)	3.00
Green, comparatively smooth and very long, often reaches 2 feet.	

EGG PLANT

F₁ Hybrid No. 1	10.00
Extra early, velvety black, oblong, small fruited. Vigorous and prolific.	
F₁ Hybrid No. 2	10.00
Longer than No. 1 Hybrid, equally early, vigorous and prolific.	
Early Purple	3.00
Very prolific variety, fruits are medium sized among Japanese varieties, rather elongated, measuring 4 inches in length. Color dark shiny blackish purple, very thin skinned.	
Long Purple	3.00
A prolific long fruited variety. Fruits are 6 to 8 inches long and not exceeding 1 to 1½ inches in diameter. Deep purple, thin skinned, having very few seeds.	
Round Purple	2.50
Fruits round and deep purple colored not unlike Black Beauty or New York Purple, but smaller in size weighing about a quarter pound when fully ripe. A heavy bearer.	

GOURD (Edible)

Round Butter Vine Gourd	1.00
Very large fruited and greenish skinned. Keep very long and can be preserved for winter use. Flesh is whitish and has no special taste, but is valuable for stew, soup, and for other cooking purposes. Especially good when cooked while fruits are young.	
Long Butter Vine Gourd	1.00
Long shaped fruit of the above type.	

JAPANESE MELON OR CANTALOUPE

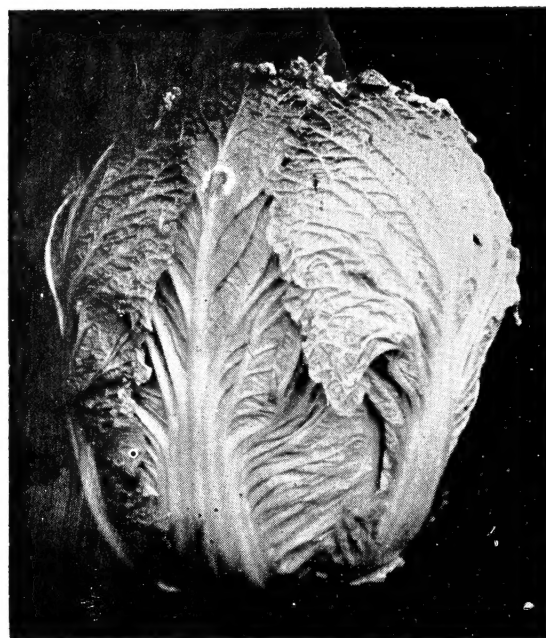

Early White Pear (white fleshed)	3.00
Large egg shaped Japanese melon or a cantaloupe, measuring about 6 inches in length and 4 inches in diameter. Skin yellow and smooth, flesh white. Juicy and very hardy and prolific.	
Early Golden Pear, large	3.00
Early Golden Pear, small	3.00
Early Speckled, medium sized thick fleshed, sweet	3.00
Golden Round, round like ordinary Cantaloupe, but smaller	3.00

JAPANESE PARSLEY

Japanese Parsley, Mitsuba	0.50
This is a perennial plant which throws up long tender leaf stalks with three heart-shaped leaves at the ends. Has special flavor and is excellent for salad and soup. Will produce more tender, sweeter and long white stalks when earthed up or bleached like celery.	

MUSTARD

Japanese White Celery Mustard	0.20
Its use as green vegetable in northern districts of Japan is quite immense. It grows up to 1½ feet in height. Lower part of leaf stalk is pure white and is very thick forming a bulbous shape: Very fleshy and taste good when cooked. We expect that this plant will gain further popularity.	

CELERY CABBAGE CHE-FOO

Per lb

MUSTARD, Continued

Per lb

Mustard Spinach or "Tendergreen"... .. \$ 0.20

As all its name implies, a very mild Mustard with a creamy spinach flavor.

Chinese Pac-Choy 0.50

Looks like miniature Swiss Chard with thick glossy leaves with mustard flavor. Tender and delicious when cooked. Useful for Chop-suy dinner.

Savoy-leaved 0.60

Savoy-leaved glossy mustard with flattened growth. A favorite vegetable among Chinese.

Seliphon 0.60

With distinct mustard flavor. Dark green abundant leaves which is quite distinct to other mustards. Delicious to eat, either raw or cooked.

ONION

Sakata's Evergreen Hardy Long White Bunching 1.00

Now a standard vegetable and one of the most important introductions in recent years. It is hardy almost everywhere in the States. Can be planted in spring and fall. We are told that the trials in the New England States by a public experiment station showed Evergreen Bunching Onion tubes are completely resistant to thrips.

RADISH

All Seasons 0.40

The most useful variety for all season culture, especially adopted for summer culture. Roots are white, and flesh brittle and firm measuring about 1 foot long and 2 inches in diameter. Pure white.

Mino Early Long 0.35

An early maturing long variety, measuring about 2 ft. long and 3 inches in diameter. Pure white.

Miyashige Long

Very fine variety which grows about 15 inches long and 3 inches in diameter, color white, but greenish at the neck. Flesh is tender, brittle and a sweet.

Per lb

Stump-rooted 0.35

Pointed-rooted 0.35

White Neck, white all way through 0.35

Nerima Long

Important market variety. Very long, narrow at the neck measuring well over 2 ft. in length and 3 inches in diameter. Flesh is snow white, brittle and a good keeper.

Stump-rooted 0.35

Pointed-rooted 0.35

Nerima Giant Improved 0.35

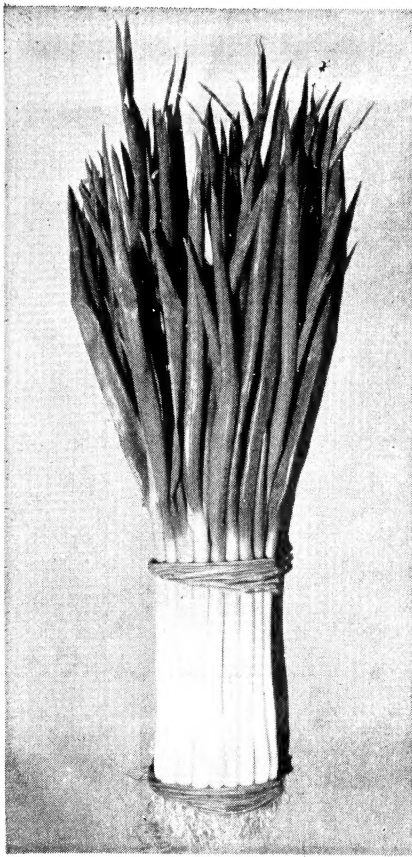

A fine variety suitable for late sowing. In mild climate it can be kept until spring in the field if well earthed up. Shape something like that of White Icicle, but decidedly larger, measuring about one and a half foot long, weighing nearly 8 pounds when well grown.

Sakurajima Mammoth 0.50

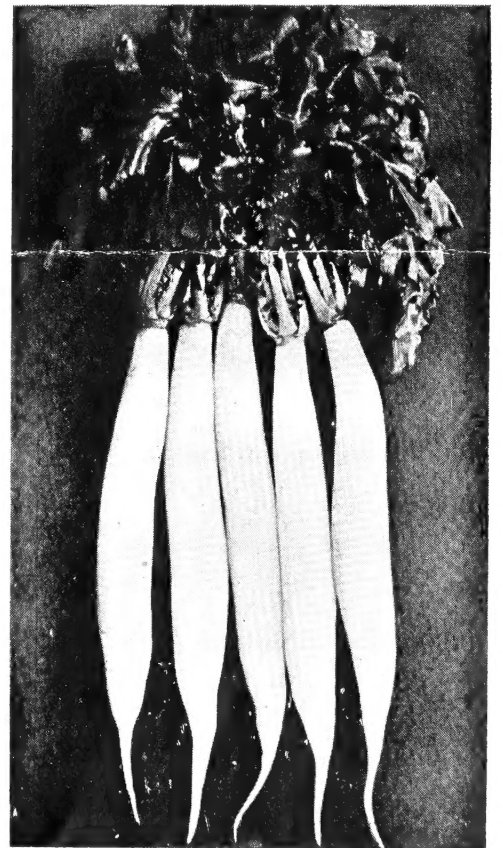

The most gigantic Radish now in cultivation. A late maturer, but grown to an immense size, often weigh over 50 lbs. Very good for cooking and also for feeding cattle.

Shogoin Round Giant 0.35

Turnip shaped, large and globular and very prolific. Roots weighing 4-5 pounds. Excellent for cooking.

SAKATA'S BUNCHING ONION

RADISH, NERIMA LONG
POINTED ROOTED

RADISH, continued Per lb

Summer Radish \$ 0.35

Best variety for summer culture, about 2 ft. long and 3 inches in diameter. Conical shaped. When sown in early spring, they can be harvested in late summer or early autumn. Pure white.

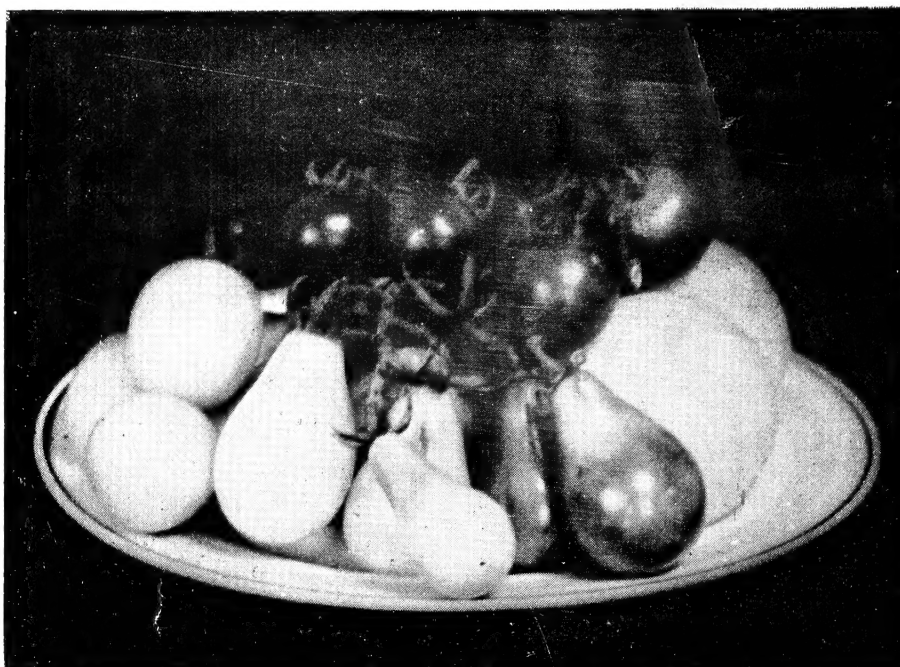

SQUASH

Aizu Early 1.50

Extra early, small-fruited, green and white when young. Very sweet.

Higata Early 1.50

Very early. In warm climate fruits are harvested already in May. Green skinned.

SMALL FRUITED TOMATOES

White Kikuza, white-skinned, good quality. Per lb 1.50

SWISS CHARD

Japanese Swiss Chard 0.25

An early strain resembling the English variety with abundant oval shaped leaves, 4 inches wide and one foot long. Used just like ordinary Swiss Chard.

SMALL-FRUITED TOMATOES

Red Cherry, Red Currant, Red Pear, Red Plum, Yellow Cherry, Yellow Pear, Yellow Peach, Yellow Plum, Red Peach Each 2.75
Golden Husk (Strawberry) 2.25

SAKATA'S FOLIAGE TURNIP

Sakata's Foliage Turnip, (Improved Shogoin) 0.20

Tennoji 0.25

Roots are just as large as Shogoin, but more flattened with smooth white skin.

Yorii, Early Flat Spring Turnip 0.25

A very fine Turnip good for both autumn and spring sowing. Roots are rather flattened, about 4 inches in diameter and 2 inches in depth, pure white and with smooth silky skin. Tops are also very good. Becoming popular every year.

Crimson Globe 0.35

Roots round measuring about four inches in diameter and of beautiful crimson color. Leaves also are of dark crimson color. Has special fine flavor.

Tokyo Market 0.40

A small but excellent Turnip largely grown for the market around Tokyo. The roots are pure white, measure about 1½ inches in diameter and 1 inch in depth, but when fully grown they reach 3 inches or over in diameter. The flesh is solid, but tender and very sweet when cooked. One of the most popular varieties in the States. We can supply excellent quality.
